**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Yates  
(3122857)

As to claim 5, Yates discloses a device comprising a housing with a side wall and a top surface, wherein said side wall includes at least one opening; wherein said top surface includes an aperture, and wherein a vertical tube communicates with the aperture (fig. 1).

As to claim 6, disclosed are opposing side walls, each of which has an opening (fig. 1).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yates  
(3122857) and further in view of Hamaker (2683951)

As to claim 1, Yates discloses a method providing a housing having a side wall with at least one opening; and placing a bait in the bait station. Not disclosed is the method of placing the station in the ground such that the opening is aligned with a tunnel and covering the station with soil.

Hamaker, however, discloses a method of placing a station in the ground such that the opening is aligned with a tunnel and covering the station with soil. It would have been obvious to one having ordinary skill in the art at the time the invention was made to comprise the method of Yates with the placement of the station underground as taught by Hamaker to place the station in the known pathway of a rodent.

As to claim 2, disclosed is a method, as modified, wherein the station comprises a top surface with an opening, and a vertical tube extending between said opening and the top of the ground.

As to claim 3, disclosed are opposing side walls which each have an opening therein and aligned with one of said tunnels.

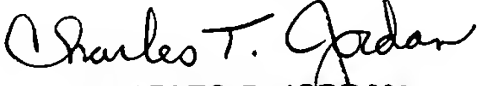

As to claim 4, not disclosed is the ingredients selected from the group cited in the instant claim. It would have been obvious to one having ordinary skill in the art at the time the invention was made to comprise the active ingredients from the group cited in the instant claim, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.
